99 Fitchburg Road, Ayer, MA 01432

KTR was established over 20 years ago, primarily performing classic Ferrari restorations. Over the years, we have grown our skills, facilities, and equipment to perform a broad range of services on a variety of classic and late-model automobiles.

At KTR, each customer is unique, with his or her own specific needs and tastes. Our customers want the peace of mind that comes with expert service. Our highly skilled technicians can handle all of your needs: complete restorations, engine/gearbox rebuilds, fabrications, race car preparation, dyno tuning, track support, servicing, storage, and transportation.

RESTORATIONS

KTR has complete knowledge of a wide variety of street and racing sportscars, along with the skills and facilities to rebuild or fabricate hard-to-find components. Our goal is to provide complete care, no matter how large or small the project.

RACING

For decades, KTR has maintained a standard of excellence in vintage and historic racing. Our goal is to provide our racing customers with well-prepared cars and convenient trackside support in a congenial atmosphere. We're proud of our abilities, as well as our commitment to safety, reliability, and performance.

REPAIRS

We can service or repair practically any component or subsystem, including gearbox, clutch, brakes, suspension, chassis, electrical, lubrication or body.

STORAGE

In the spirit of total customer care, we've dedicated an area in our modern, climate controlled building for the secure storage of specialized vehicles. Your car is protected, monitored, and ready to go on short notice.

TUNING

KTR can provide upgrades and maintenance for your late model European car. Our services include:

- Software Tuning
- Engine Modification (Blueprinting, Head Modification)
- Transmission Rebuilding and Strengthening
- Suspension Upgrades and Modifications
- Interior Upgrades (Stress bars, Racing seats)
- Mandrel Bent roll cages
- Stand-alone engine management tuning

CLUB EVENTS

KTR is located on 16 secluded acres of open, flat property.

We are an active member of the motorsports community and are happy to host club meetings or events. Our 32,000 sq. ft. facility can host large or small group meetings, rally departures, seminars, tech inspections, dyno days, and social events. The diverse group of sports and racing cars that are in our shop at any given time provides a unique motorsports backdrop for your event.

CHASSIS DYNO

KTR utilizes our in-house Dyno Dynamics 4WD Low Boy dyno for diagnosis, performance, exhaust emission testing and research & development.

Our Dyno Dynamics 4WD dynamometer with its 4WD Smart system supports all variations of FWD, RWD, AWD, and 4WD vehicles due to its unique ability to control speed and load to each axle independently.

By using the dynamometer we can:

- Diagnose more efficiently and effectively, saving you time and money
- Test new products such as exhaust systems for horsepower gains
- Fine tune your car based on readings such as Air:Fuel ratio, Manifold Vacuum/Boost, Exhaust Gas Temperature, and Engine speed, all while the car is under load

We install and sell only the highest quality performance products that have been proven through our own extensive in-house dynamometer testing, street driving and racing experience. Here are a few of the product lines we currently offer: Sparco Race Products, BMC Air Filters, StopTech Brakes, ArmorGlove Paint Protection, AC Schnitzer (BMW), APR (Audi Performance Racing), FVD (Porsche), and TechArt (Porsche).
